

I am writing to you in regards to NAB's petition 04-160. I am an over-the-road driver. Time to me is money. When I am traveling down the road I need to know in an instant what the traffic and weather is doing in a specific area at a specific time. So I rely on my radio to give me that information. However, a majority of the time I only get traffic from 6am-9am, 3pm-6pm and that's might be once every 30 minutes and that might only be 15 seconds long. Then they only give the weather forecast that's up dated every 6 hrs. I purchased my XM radio system so I could get instant traffic, weather and news. I rely on it more than I do my local radio. Plus all the other programs I get to listen to when I am traveling in rural areas. I guess you can say it's like cable tv of radio. What I am saying is that, If I pay for a service. I should get what I want. if I don't want to listen to my XM radio. I shut it off and listen to the local stations. Simple as that. I get that in cable, satellite tv. and internet. why should I not get it on radio. I along many others love my system and I don't want it changed by few people that have no clue on what is good for me. So I am asking you to deny the NAB's request. Let us have what we pay for and enjoy hours of listening without censorship. Because once we start censoring, we just as well live like we are in communism. thank you!!!!
